
Coding Clinic for ICD-10-CM/PCS

Continuing Education Quiz 204-10

Postmarked no later than April 1, 2021

Fourth Quarter 2020

1. A 12-year-old patient was seen by the provider because of fatigue, night sweats, and arthralgia. Skin nodules of the left leg were present on physical examination. Laboratory testing showed a high eosinophil count and the provider confirmed a diagnosis of lymphocytic variant hypereosinophilic syndrome. **Assign the appropriate ICD-10-CM code for lymphocytic variant hypereosinophilic syndrome.**

2. A 36-year-old patient was admitted for treatment of cytokine release syndrome (CRS), grade 3, due to COVID-19. **What is the correct sequencing for the admission? A. U07.1, D89.833 B. D89.833, U07.1**

3. A 22-year-old patient presents with symptoms of wheezing, coughing, shortness of breath/difficulty breathing, inflamed nasal mucous membrane and chest tightness. Following diagnostic workup, the provider diagnosed acute exacerbation of severe persistent eosinophilic asthma. **Assign the correct ICD-10-CM code(s) for an exacerbation of severe persistent eosinophilic asthma.**

4. An 89-year-old female with known osteoporosis fell from bed at the nursing home with resultant rib fractures. The provider was queried and confirmed that the rib fractures were due to osteoporosis and advanced age. **Assign the appropriate ICD-10-CM codes for this admission.**

5. A 47-year-old patient was seen in the emergency department for cellulitis of two fingers on her right hand. She was admitted to start intravenous antibiotics due to having an immunocompromised state caused by immunosuppressant medication that she takes for systemic lupus erythematosus (SLE). **Assign the correct ICD-10-CM codes for this case.**

6. A 68-year-old patient with a history of congestive heart failure (CHF) with Class III-IV symptoms underwent placement of a V-wave atrial septal shunt device. Venous access was obtained from the right femoral vein. An atrial septal puncture was performed and a guidewire was advanced into the superior vena cava. A trans-septal puncture was made at the mid-portion and slightly posterior aspect of the right atrium into the left atrium. The V-wave shunt was advanced (via trans-septal catheterization) into the left atrium and positioned across the septum. **Assign the appropriate ICD-10-PCS code for this procedure.**

7. A 59-year-old patient, who is status post pancreaticoduodenectomy, presents with stenosis of the pancreaticojunostomy. A robotic lateral pancreaticogastrostomy is performed with the objective of decompressing the pancreatic ductal system. At surgery, robotic scissors were used to open up the pancreatic duct along its length extending out towards the tail. The back wall of the stomach was opened up and the pancreatic duct was anastomosed to the stomach. **Assign the appropriate ICD-10-PCS code(s) for this procedure.**

8. A 25-year-old patient was admitted with vaginal bleeding and lower abdominal pain. Twin gestation in the left fallopian tube was revealed during diagnostic laparoscopy, along with a bleeding rent in the distal aspect of the tube. A laparotomy was performed and extended in both transverse directions. The left tube was exteriorized, gentle pressure was applied on the left tube, and the products of conception were expelled from the rent in the left tube. The rent was then repaired with sutures. **Assign the appropriate ICD-10-PCS codes for the removal of ectopic pregnancy through a rent in the left tube, by applying pressure.**

9. A 21-year-old patient experienced infiltration of the IV in her left wrist that caused significant swelling of her forearm and hand. At bedside, an intercompartmental pressure reading was performed to rule out acute compartment syndrome. The sites were checked using a needle and a compartment measurement device. **Assign the correct ICD-10-PCS code for measuring the intercompartmental pressure of the forearm and hand.**

10. A 36-year-old patient presents for robotic cholecystectomy with Firefly™ indocyanine green (ICG) cholangiogram. Firefly™ ICG imaging uses infrared technology. **Assign the appropriate ICD-10-PCS code for the intraoperative cholangiogram using infrared imaging with ICG dye.**

Name: _____

Daytime phone number _____

Subscription Status:

Personal

Institutional (Specify institution if not part of the address) _____

No Credit Earned

Score not passing; less than 70%

Test incomplete

Fee not enclosed

Submitted past due date

Verification

This is to certify that the person named above has earned one hour of continuing education credit by completing this test with a grade of 70% or better.

Coding Clinic
Continuing Education Quiz
Due on or before April 1, 2021

Instructions

Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA's continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:

Central Office on ICD-10-CM/PCS
Attention: Continuing Education

FOLD #1

FOLD #1

Enclose check or money order for \$25 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the \$25 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the \$25 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff's understanding of topics presented in *Coding Clinic*.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA's official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
